

Background Information

Designation National Research and Development Agency New Energy and Industrial Technology Development Organization (NEDO)
Business name: New Energy and Industrial Technology Development Organization (NEDO)

Foundation Originally established as a semi-governmental organization on October 1, 1980; reorganized as an incorporated administrative agency on October 1, 2003

History

October 1980	New Energy Development Organization established under the Law Concerning the Promotion of the Development and Introduction of Alternative Energy
October 1988	Industrial technology research and development added; name changed to New Energy and Industrial Technology Development Organization
October 2003	Incorporated Administrative Agency New Energy and Industrial Technology Development Organization established under the Act on the New Energy and Industrial Technology Development Organization
April 2015	Redesignated and renamed National Research and Development Agency New Energy and Industrial Technology Development Organization to reflect the enforcement of a partial amendment of the Act on General Rules for Incorporated Administrative Agencies and the Act on the New Energy and Industrial Technology Development Organization

Missions Addressing energy and global environmental problems
NEDO actively undertakes the development of new energy and energy conservation technologies, verification of technical results, and introduction and dissemination of new technologies (e.g., support for introduction). Through these efforts, NEDO promotes greater use of new energy and improved energy conservation. NEDO also contributes to a stable energy supply and the resolution of global environmental problems by promoting the demonstration of new energy, energy conservation, and environmental technologies abroad based on knowledge obtained from its domestic projects.

Enhancing industrial technology
With the aim of raising the level of industrial technology, NEDO pursues research and development of advanced new technology. Drawing on its considerable management know-how, NEDO carries out projects to explore future technology seeds as well as mid- to long-term projects that form the basis of industrial development. It also supports research related to practical application.
