

International Demonstration Project on Japan's Technologies
for Decarbonization and Energy Transition
Front End Engineering Design (FEED) 2025 1st Public Solicitation Result

No.	Provisional Project Name	Entities
1	Demonstration research for the distillation and membrane system to improve recycling of wasted oily coolant water (Thailand)	Sun-up Corporation
2	Demonstration study of a transportation system for efficient operation and management of snow removal operations (Canada)	Zenmov Inc.
3	International Demonstration of Co-firing of Renewable Black Pellets in Coal-fired Thermal Power Plants for Reducing CO2 Emission (Vietnam)	Nihon Toyo Co., Ltd
4	Field Demonstration of Lithium Recovery Equipment Utilizing Produced Water Recycling (United States)	Licube KK
5	Demonstration Research on Innovative Biochemical Technologies for the Production and Dissemination of Renewable Energy and Resources (Thailand)	Zeon Corporation
